A simple system for Person Features

1st person	[Person 1]
2nd person	[Person 2]
3rd person	[Person 3]

(e.g. Stump 2001)

Potawatomi Personal Pronouns

n-in	'I'
k-in	'thou'
w-in	'(s)he/it'
n-in-an	'we (exc.)'
k-in-an	'we (inc.)'
k-in-wa	'ye'
w-in-wa	'they (animate)'

- ▶ cannot be captured by the simple feature system

A Standard System for Person Features (Noyer 1992)

1st person exclusive	[+1 -2]
1st person inclusive	[+1 +2]
2nd person	[-1 +2]
3rd person	[-1 -2]

Potawatomi Personal Pronouns: Affixes by Features

k-	addressee involved	[+2]
n-	addressee excluded but speaker involved	[+1]
w-	referent not local	[−1−2]
-nan	lful plural	[+1 −pl]
-wa	lless plural (animate)	[−1 −pl]

An even Richer Feature System for Person

- [+1] A FS containing [+1] denotes a non-empty group containing the Speaker
- [−1] A FS containing [−1] denotes a non-empty group **not** containing the Speaker

- [+2] A FS containing [+2] denotes a non-empty group containing the Hearer
- [−2] A FS containing [−2] denotes a non-empty group **not** containing the Hearer

- [+3] A FS containing [+3] denotes a non-empty group containing exclusively non-SAPs
- [−3] A FS containing [−3] denotes a non-empty group **not** containing exclusively non-SAPs

Ambiguous Inverse: The Dumi Marked Scenario Affix

“This pattern reflects a pronominal markedness hierarchy The Dumi marked forms express all scenarios involving a first or second person actant except those with a first person agent or subject.” (van Driem, 1993:123)

a-	-
$2 \rightarrow 1$	$1 \rightarrow 2$

Possible Person Categories

3rd person [+3 -1 -2] a nonempty group containing exclusively non-SAPs and not containing Speaker or Hearer

1st exclusive [-3 +1 -2] a nonempty group **not** containing exclusively non-SAPs containing the Speaker but not the Hearer

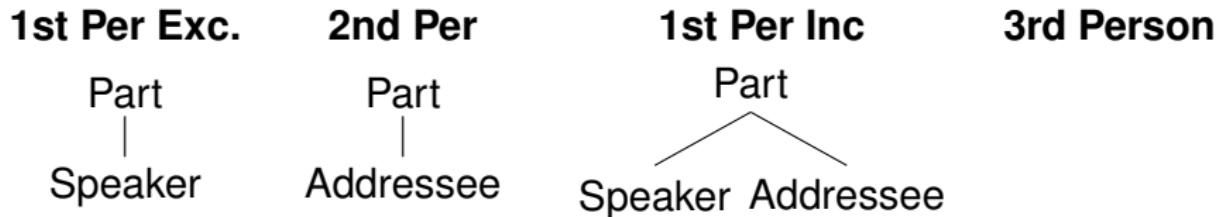

1st inclusive [-3 +1 +2] a nonempty group **not** containing exclusively non-SAPs containing the Speaker and the Hearer

2nd person [-3 -1 +2] a nonempty group **not** containing exclusively non-SAPs containing the Hearer but not the Speaker

Impossible Person Categories

- *[+3 +1 +2] a nonempty group containing exclusively non-SAPs and containing the Speaker and the Hearer
- *[+3 +1 -2] a nonempty group containing exclusively non-SAPs and containing the Speaker but not the Hearer
- *[+3 -1 +2] a nonempty group containing exclusively non-SAPs and containing the Hearer but not the Speaker
- *[-3 -1 -2] a nonempty group **not** containing exclusively non-SAPs and not containing the Hearer or the Speaker

Bierwisch (1967) über Geordnete Regeln

“The choice between unordered and ordered rules is obvious. The use of ordered rules is to be preferred not only because of the economy of features, but also because the simplification is achieved by very general principles governing the form of grammars” (p. 266).
