

## Vorlesungsankündigung WiSe 2021

### „Planning and Conducting an Experiment in Cognitive Psychology” (2 SWS, fakultativ)

The language of instruction in this seminar is English!

**Description:** In this seminar, we will introduce the key skills and knowledge required for quantitative research in neuropsychology. Through active group discussion and practical work, we will explore the nature and principles behind various stages of empirical research. Students will gain hands-on experience in designing and programming an (online) experiment, as well as analysing and interpreting data. This seminar serves as an ideal complement to the curriculum and is open for everyone: prior experience is not required.

**Time:** Fridays 12:15 – 13:45 (first seminar on 15<sup>th</sup> October 2021)

**Location:** The seminar is planned as a hybrid, some sessions will take place online (via zoom) and some in presence.

**Enrolment:** Please register by sending an email to Philipp Berger ([berger@cbs.mpg.de](mailto:berger@cbs.mpg.de)) no later than 30<sup>th</sup> September 2021.
